Professional Summary

Detail-oriented B.Tech Computer Science & Engineering (AI & ML) student specializing in Retrieval-Augmented Generation (RAG) pipelines, Large Language Models (LLMs), and vector databases alongside full-stack application development. Experienced in building machine learning classifiers, interactive GUI applications, and integrating AI backends with modern web/mobile frameworks. Seeking AI Engineer or ML Intern opportunities.

Education

Amrapali University — Haldwani, Uttarakhand
Bachelor of Technology in Computer Science & Engineering (AI & ML) — *Expected June 2028*

Work Experience

Full Stack Developer Intern — Jun 2026 – Aug 2026
Ruhanix Creations OPC Pvt. Ltd. — *India*

- Engineered full-stack web and mobile applications using React Native, Expo, Node.js, Express, and PHP.
- Implemented secure RESTful APIs with JWT authentication for session management and user access control.
- Designed responsive interfaces and integrated complex machine learning models into live application backends.

Projects

AI RAG Search Engine & Document Query System | *Python, LLMs, LangChain, RAG, Vector DB*

- Built a Retrieval-Augmented Generation (RAG) system utilizing vector embeddings to query document datasets with high context accuracy.
- Fine-tuned open-source LLMs to generate precise answers, reducing search latency and improving response quality.

Online Quiz System | *Python, Tkinter GUI, SQLite*

- Developed an interactive desktop quiz application featuring custom UI dialogs, automated score evaluation, and lightweight relational database management using SQLite.

Ruhanix Crowdfunding Platform | *React Native, Expo, Node.js, Express, MySQL*

- Developed a full-stack cross-platform mobile crowdfunding application with custom REST API integration.

House Price Prediction System | *Python, scikit-learn, Machine Learning*

- Developed regression models in Python using scikit-learn to forecast housing prices with optimized feature engineering.

Decision Tree Classifier for Salary Analysis | *Python, scikit-learn, Data Analytics*

- Implemented decision-tree classification models to analyze salary data structures and predict compensation tiers.

Technical Skills

AI & Machine Learning: RAG (Retrieval-Augmented Generation), LLMs, Fine-tuning, Vector Databases, PyTorch, TensorFlow, scikit-learn
Programming Languages: Python, JavaScript, SQL, C/C++
Web & Mobile Development: React Native, Expo, Node.js, Express.js, PHP, REST APIs, HTML/CSS
Databases & Tools: MySQL, SQLite, Oracle, Git, GitHub, CI/CD Workflows, Vercel, Railway

Certifications & Achievements

- ServiceNow Certified System Administrator
- YuvaIntern Data Analytics Specialist & Language Processing Certification
- NSDC Approved AI-ML Engineer Certification
- Applied Machine Learning – Forage Virtual Experience
- HackerRank Certified: Data Visualization, Python, SQL, JavaScript
